

Where Is Your House Leaking Time?

Twenty statements. Tick only the ones that are true today, not the ones true on a good week. Your lowest scoring section is where the house is costing you most, and it is almost always the one you are not thinking about.

01 Where Things Live

TRUE

Somebody other than me could find the spare batteries right now	
Nothing important is stored only in one person's head	
A guest could put a glass away in the right cupboard unprompted	
I have not searched more than five minutes for anything this week	

02 What We Own

TRUE

I could say how many packets of flour are in this house without looking	
Nothing has been bought twice this month by mistake	
Food has not been thrown away because it went out of sight	
I know what is low before I am standing in the store	

03 How Work Gets Done

TRUE

The house returns to a baseline once a day, at a set time	
Somebody specific owns that reset, by name	
Anyone helping knows the standard without being told each time	
The week has set days for laundry, not whenever it overflows	

04 Who Carries It

TRUE

I am not the only person who can answer where something is	
Nobody texts me from a shop to ask what we need	
If I were away a week, the house would still run	
Help in this house does not need me standing next to it	

05 Paper And Decisions

TRUE

Forms, bills and warranties have a home that is not the counter	
I could find any document in under two minutes	
The same decision does not get made twice	
Paper leaves this house as fast as it comes in	

YOUR SCORE	17 to 20 · The house runs itself. Protect what is working.	11 to 16 · One section is carrying the rest. Fix that one first.	Under 11 · You are the system. That is the thing to change.
